**Ohio Commercial Code-** The Ohio Board of Building Standards (BBS) took final action on the Ohio Building Code (OBC), setting the effective date for November 1, 2011. The rules were recently re-filed with JCARR after concerns were raised regarding the incomplete fiscal analysis. After amending its filing, the BBS rules passed through JCARR and were formally adopted.

**The Residential Construction Advisory Committee (RCAC)-** has completed its review of the text version of the Residential Code of Ohio (RCO). Before making its recommendation to the Board of Building Standards (BBS), the RCAC has posted its second draft online for 30 days to allow interested parties to review the draft language. RCAC proposed changes are shown in italicized text and a list of sections proposed to be modified is located at the end of each chapter. Full text of the draft can be viewed at [www.com.ohio.gov/dico/BBS.aspx](http://www.com.ohio.gov/dico/BBS.aspx)

Written comments should be sent to the BBS office or E-mailed to [dic.bbs@odoc.state.oh.us](mailto:dic.bbs@odoc.state.oh.us) by August 22, 2011.

**New Lead Paint Reg. Pulled By EPA-** PHCC and industry objections to the Environmental Protection Agency's (EPA) proposed “dust-wipe testing” rule seem to have had their intended effect. By the end of last week, the EPA had announced it had rejected the new regulation, which would have added third-party clearance testing to the agency's Lead Renovation, Repair and Painting (RRP). The announcement comes on the heels of Rep. Denny Rehberg's, R-MT, amendment to the Department of the Interior's appropriations bill that would restrict EPA funding until the agency “approves a test kit that meets the ‘false positive’ and ‘false negative’ criteria stated in the regulation.”
